

LUIZ C. ESTEVES, MSc

Mr. Esteves holds a bachelor and Master of Sciences degrees in Telecommunications and post-graduate studies in computer networks and data processing. He established in 1990 a successful management consulting office in Montreal that until recently took him in assignments the world over to clients spanning from medium to large corporations, government departments and non-profit organizations.

Luiz C. Esteves has performed duties as Business Advisor, Country Manager, long-term Consultant and independent evaluator in support of clients' market entry objectives facing cross-cultural settings as understanding, planning, evaluation, implementation and management of business objectives in foreign markets. He has executed project management responsibilities in multi-million-dollar engineering projects in Canada and internationally, has developed innovative devices and methodology solutions leading to patents, and was engaged in numerous strategic and operation planning dialogues with government officials, private and volunteer sector leaders.

Luiz initiated his career in Rio, Brazil as university professor and researcher whose work led him to sole authorship of a pioneering textbook published by McGraw-Hill Ltd. He held management positions in several space mission programs in Brazil and Canada, and has published several papers in the telecoms and telehealth fields.

His vision of a fairer world for all led him to co-founding e-KSS Inc. and to lead the non-profit organization on a pro-bono basis as its first Executive Director. It pursues a humanitarian goal of reducing health care inequalities and appalling maternal and infant mortality rates afflicting disadvantaged remote communities.
